

## *Instructional Systems Design: effective training design (1 of 2)*

### Learning objectives

- ❑ Apply the Instructional Systems Design (ISD) process in training design
- ❑ Conduct an activity analysis to identify participants characteristics, contents and objectives
- ❑ Structure the course based on the activity analysis
- ❑ Define learning objectives aligned with the activity analysis
- ❑ Classify learning objectives according to performance levels
- ❑ Classify contents (facts, concepts, processes, procedures, structures, principles)
- ❑ Acquire a method to design didactical materials according to content types
- ❑ Plan the evaluation of training efficacy

## *Instructional Systems Design: effective training design (2 of 2)*

### Structure of the program
