

# Designing learning test

## Course structure – virtual classroom

- ✓ 4 modules (2 hours each) with exercises during and between one module and another
- ✓ **individual development plan** at the end of the last module
- ✓ follow-up (2 hours) after 6 weeks to share the progress and results obtained and continue the application of the techniques acquired
- ✓ **maximum 6 participants**

**Individual coaching upon request** during or after the course for a **customised** approach based on your specific needs

## Why participate?

Evaluating the learning level of participants at the end of a training is an important step in verifying the effectiveness of the training provided.

The course provides **proven techniques and tools** for designing effective tests that allow to understand the real learning level of the participants for training continuous improvement.

The course includes **exercises with feedback** in order to facilitate participants' engagement and learning.

## Objectives

- ✓ identify **when to use and how to structure** a learning test
- ✓ improve existing multiple choice tests identifying **design mistakes**
- ✓ apply guidelines to designing effective and valid **multiple-choice tests**
- ✓ conduct a **statistical analysis** of the test items to evaluate effectiveness and validity

**Language** English, Italian
