

Instructional Systems Design:

Effective training design

Course structure – virtual classroom

- ✓ 4 modules (2 hours each) with exercises during and between one module and another
- ✓ **individual development plan** at the end of the last module
- ✓ follow-up (2 hours) after 6 weeks to share the progress and results obtained and continue the application of the techniques acquired
- ✓ **maximum 6 participants**

Individual coaching upon request during or after the course for a **customised** approach based on your specific needs

Why participate?

Designing and developing traditional or online training requires specific skills.

The course provides an **internationally validated methodological model** for making training design really effective.

The course includes **simulations with feedback** in order to facilitate participants' engagement and learning.

Objectives

- ✓ conduct an **activity analysis** to identify participants characteristics, course contents and objectives
- ✓ **structure** the course based on the activity analysis
- ✓ define **learning objectives** aligned with the results of the analysis
- ✓ **classify and design training contents** (facts, concepts, processes, procedures, structures, principles)
- ✓ plan the **evaluation** of training **effectiveness**
